Project Title: Bauhaus Website

I want to build this as a multi-page site instead of one long scrolling page, with navigation across the top. Four pages is enough to cover the main parts of the story.

- **Home Page/Introduction** – Introduce the Bauhaus, the German art and design school (1919–1933) founded by Walter Gropius, and its core idea of combining art, craft, and function.
- **History** – The school's story across its three locations: Weimar, Dessau, and Berlin, and how it closed under Nazi pressure in 1933.
- **People and work** – Key figures like Gropius, Mies van der Rohe, Kandinsky, Klee, and Marcel Breuer, with examples of Bauhaus architecture, furniture, and typography.
- **Legacy** – How Bauhaus ideas spread around the world and still shape design today. Sources, including the Wikipedia page and photo credits, will be listed at the bottom of this page.
